

Customer Success Story – Maldives Gas BRS Study

CloudFronts worked with Maldives Gas to conduct their BRS study before extensive Microsoft Dynamics ERP implementation plan.

About Maldives Gas

Maldivian Gas is a public-private company established on 3rd October 1999, in union with State Trading Organization (PLC) and Champa Oil and Gas Private Limited. They were instrumental in bringing an end to the consumption of old-fashioned stoves by replacing them with the much-improved gas stoves in Maldives. Today, apart from being the largest LPG and Medical Oxygen provider in the Maldives, the company owns four distribution facilities in Thilafushi, Male' Villimale, and Hulhumale. Please read further about the customer here <https://maldivegas.com/>

Business Challenges

Maldivian Gas is looking to replace their legacy platforms with a single platform to manage their business operations. They required CloudFronts to establish Business Requirements Study (BRS) to document current business operations, processes, systems and provide extensive recommendations on the implementation of Microsoft ERP.

Solution

An ERP implementation entails investment in both time and money. CloudFronts team travelled onsite and collected the data and resources required to complete the ERP implementation. The study was conducted on the basis of the multiple value parameters like Needs Assessment, Resources Assessment, Technical Assessment and Company Culture Assessment. The overall assessment produces the information like potential ROI, support business workload, and figure out how users will respond to the new ERP and how much time your organization is willing to put into change management.

Key Technologies

1. Dynamics 365 Finance
2. Dynamics 365 Supply Chain Management

Post Go-live

Post BRS study, Maldivian Gas has been able to gather significant insights related to the ERP implementation. Their engagement has enabled CloudFronts to document current processes and make an informed decision, mitigate risks, gain comprehensive feedback and form consensus before implementing an extensive Dynamics ERP implementation plan.
